Almost Like Birds.

It is a little known fact that flying fish, encountered in the tropics, actually flap their wings the same as birds. It is commonly supposed that the fish merely volplane, sail, after getting a good start with rapid swimming. The flapping of their wings, however, is so easily seen that it can be detected with the naked eye. Also, flying fish are delicious for the table.

Persian and African Donkeys.

Two species of the Caucasian donkey, the one from Persia, the other from Africa, says a nature student. Persia is also responsible for the proud mountaineers' fondness for chicken; our European ancestors got their roosters at some time during the historic period. Finally the famous Caucasian sheep took one day their departure from the broad plains situated between Persia and the Caspian sea.

Mudholes.

Whatever has been said at one time or another about mudholes, it has remained for Arthur F. Killick (Fatty Lewis) to define one. Says Killick: "A mudhole is a body of water, irregular in size and shape, that failed to get from one side of the road to the other."—Kansas City Times.

Electric Water Heater.

An electric heater has been invented by means of which the water in a bath after it has been filled can be raised to any desired temperature.

Origin of Pig, Buffalo, Horse.

Asia mainly furnished the pig, remarkable by its archaic type, which is very close to the Sus palustris, notes a writer. Through Turkistan arrived the buffalo, which adapted its body from its surroundings—becoming smaller and more alert. The Caucasus also owes the horse to Turkistan; we find neolithic remnants of the domesticated horse at Anan, while the animal is not found in Creta before the bronze age.

PATENTS

TRADE-MARKS and copyrights obtained on fee. Send model, sketches or photos and brief description. For FREE SEARCH and report on patentability. 10 years experience. Send 2-cent stamp for NEW BOOKLET. Full of patent information. It will help you to fortune.

READ PAGE 11 and 12 before applying for a patent. Write today.

Two of These Shoats Gained 36 Lbs. More Than The Other Two in 90 Days

Listen to a fellow Indiana farmer—H. Vandolah, of English, down in Crawford County, says to you:

"I used Avalon Farms' HOG-TONE on two shoats taken from the sow in good shape. Fed them with two others of the same litter. Gave each the same amount of feed. 'I got 36 pounds more gain on the two treated with HOG-TONE over the two not treated. In 90 days' feeding! And got the nicest meat I ever saw on the treated ones. Could tell the difference at sight on the pole or cut up. Did not find a worm, neither stomach nor kidney worm in the treated ones."

CHAMPNEY'S PHARMACY, PERRYBURGH, OHIO

BIG FIGHT ON FOR LEGISLATURE

Will Ohio Ratify National Prohibition?

ACID TEST FOR CANDIDATES

How the Present Ohio Senate and House Stands on the Wet and Dry Question and How Counties and Senatorial Districts Voted on State-Wide Prohibition Last November Looks as If Drys Will Control Both Branches of New General Assembly.

Now that Congress has put National Prohibition up to the states, and as the states ratify or reject the proposed amendment to the Federal Constitution through their legislatures, and as Ohio will elect a new General Assembly this year, an analysis of the Ohio situation at this time is most interesting.

Regardless of what some politicians desire, the wet and dry question will be the dominant issue in Ohio this year. In fact it will be the only big issue. Everybody is for the vigorous prosecution of the war so that cannot and will not be an issue. The fact that Ohio will again vote on state-wide prohibition and that the legislature to be elected this year and which will meet a year from this time will vote on the ratification of the National Prohibition amendment, is certain to bring the wet and dry question prominently to the front.

What about the legislative situation? At the time the present legislature was in session a year ago, the country had not entered the war and war prohibition was not before that body, and in fact no wet and dry question of importance was considered. It was generally believed that while the Senate was wet by a narrow margin the House was dry.

There are 24 Senatorial Districts in Ohio, and there are 36 Senators in the present body. Last November six of these Senatorial districts with 13 members in the present Senate, returned wet majorities, while 18 districts with 23 members gave dry majorities. Under the Senatorial apportionment, one of these wet districts, the Cleveland district, will lose one Senator in the next General Assembly, while two of the dry districts—the 20-22nd and 24-26th—will lose one each.

The Senate to be elected this year will contain 33 instead of 36 members. If the Senatorial districts elect senators this year on the basis of the wet and dry vote of last November, the next Senate will have 12 wet members and 24 dry members.

There are 128 members of the present Ohio House. The House to be elected this year will have 124 members. The counties of Belmont, Columbiana, Franklin and Hamilton will each lose a member. Last November on the state-wide prohibition vote, 76 of the 88 counties voted dry and 12 voted wet. The 12 counties which voted wet will have 39 members in the next House, and the 76 counties which voted dry will have 85 members.

Of the 12 counties which voted wet last November, Cuyahoga will have 13 members in the next House; Hamilton, 9; Lucas, 4; Montgomery, 4; Butler, 2; and Auglaize, Erie, Mercer, Ottawa, Sandusky, Scioto, and Shelby, one each.

Of the 76 counties which voted dry last November, Franklin will have 4 members in the next House; Lorain, 2; Mahoning, 3; Stark, 3; Summit, 2, and the remaining 71 will have one each.

On the basis of last November's vote, there is no reason why the drys of the state should not control both branches of the next General Assembly by wide margins. To see to it this is done is now the duty to which they must address themselves.

WHAT THE RECORDS SHOW

How Saloons Affect Repopulation of Trumbull County's Children's Home.

Warren, O.—(Special).—In the 27 years in which the Trumbull county children's home has been in existence, Niles, a city in that county, has furnished 317 of the 664 children admitted from the entire county.

During the five years Niles was dry, five children per year on an average were admitted to the home from Niles. In the years when Niles has been wet there has been an average of 16 children admitted from that town each year.

During the last two years Niles has furnished the home with 50 children. Not one was an orphan. In almost every case drink had caused the parents to separate or to be unable or unwilling to support their children.

Beer Sales Slump.

Washington, D. C.—Evidently Americans are not drinking so much beer these war times. According to the Internal Revenue Commissioner, the number of barrels of beer sold the first quarter of this fiscal year is fewer by 2,708,627 than were sold in the corresponding period last year. The slump shows that the people are exercising good sense by letting alone that which is injurious and which does not do anybody any good.

HERE IT IS!

The Only
Kitchen Cabinet
With the Wonderful
Automatic
Lowering
Flour Bin

Just what you have been wanting and waiting for. Makes filling the flour bin as easy as reaching for a pot or a pan. Nothing like it on any other cabinet.

The Sellers "Special" also has the wonderful Automatic Base Shelf Extender, the Sanitary Porcelain Worktable, Ant-proof Casters, White Enamel Interiors and dozens of other grand features.

SELLERS "SPECIAL"

"THE BEST SERVANT IN YOUR HOUSE"

is the cabinet which has taken the housewives of America by storm. Wonderful in construction—marvelous in design—rich in beauty—has more real conveniences and labor-saving features.

COME IN AND SEE DEMONSTRATION.

You'll be delighted with every feature and be surprised at the low cost.

The Big Sale is now going on and this is your opportunity to get a Sellers "Special" at the price of an ordinary cabinet.

Don't put it off! Call and have the Cabinet demonstrated and ask about prices even if you are not ready to buy.

SPECIAL BARGAINS IN OUR OTHER DEPARTMENTS.

A. J. WITZLER.

So to Speak.

"That lets me out," said the prisoner as the governor signed his pardon.

No Woman Auctioneer.

Although there is no record that a woman has ever been an auctioneer, it is on record that in May, 1912, the mayor of New York, Mr. Gaynor, answered an inquiry addressed to him by a woman by saying that there was nothing in the law to prevent a woman from becoming an auctioneer. Strange enough, it was a milliner who made the inquiry.

Nitric Acid From the Air.

French chemists have given very close study to the Serpeck method of manufacture of nitric acid from the air. In this process bauxite is used. If this process can be worked out on a satisfactory basis it will connect the nitrate industry with the very important aluminum industry.

Staples of Norwegian Wealth.

Fish and timber are the staples of Norwegian wealth. Not a sheep or a steamer navigates the coast but is laden, wholly or partially, with one or the other commodity.

STATEMENT OF OWNERSHIP, MAN

AGEMENT, CIRCULATION, ETC., of The Perryburg Journal, published weekly, at Perryburg, Ohio, required by the Act of August 24, 1914.

Editor—E. L. Blue, Perryburg, O.

Managing Editor—E. L. Blue, Perryburg, O.
